bringing technology to life

*Hospital to Homecare Solutions*

**DESIGNED FOR A BETTER LIFE**

# The Way to Better STARTS WITH US

For us Matheus is a superhero. He was born with multiple health issues. Matheus is 6 years old, has lost his sight and needs support to eat and drink. He is now at home after a long 12 months in the hospital with the permanent support of infusion pumps for hydration and nutrition.

Recently Matheus had a breakthrough. He began to use the CADD®-Solis ambulatory infusion pump. Since he can carry his pump with him, he no longer needs to be confined during the day, allowing him to move and play where he would like. The CADD®-Solis pump takes care of Matheus's hydration, allowing him to focus on what matters most. Being a superhero. Because helping Matheus live his life at home is what matters most.

## *Patient and Provider*

### **HOSPITAL TO HOMECARE SOLUTIONS**

At Smiths Medical, we are passionate about improving and saving the lives of patients through high quality, innovative medical devices and services. We understand quality homecare means giving patients the best experience possible, which is why we design our solutions to help people get out of the hospital sooner, and remain home longer.

We are dedicated to partnering with you to help deliver care when and where it is needed.

## *We Partner With You To Help ...*

### **ENHANCE PATIENT CARE**

Our products are designed for ambulatory care, simple to learn and used by patients and caregivers, enhancing the transition to home and improving quality of life.

### **INCREASE EFFICIENCIES AND REDUCE COSTS**

With a strong focus on both therapy efficacy and accuracy, our products help to deliver therapies in the home setting to increase efficiencies.

### **IMPROVE PATIENT EXPERIENCE AND ADHERENCE TO TREATMENT**

Our products are designed to provide ease-of-use, convenience and patient comfort, which can support adherence to therapy.

### **PROTECT CAREGIVER AND PATIENT SAFETY**

We help protect patients, caregivers and healthcare professionals with innovative safety designs across our product portfolios. Delivering peace of mind in home infusion, vascular access, tracheostomy care and respiratory care.

## Our Hospital to Homecare THERAPY AREAS

### Oncology

---

Smiths Medical makes a real difference to the quality of patients' and families' lives. We are committed to helping clinicians deliver quality care by the provision of flexible infusion devices backed by technical service and support. Our complete system of ports and needles, with their low-profile infusion sites, allows clinicians to choose the solution tailored to patients' needs. Therapy is delivered accurately and simply, to help enhance patient outcomes.

### Respiratory

---

Patients with chronic respiratory diseases expect good quality of life and desire to live it to the fullest. Therapy needs to fit into busy schedules and should be flexible, user friendly, economic, and convenient. Adjustable therapy helps patients take back control and stay well.

### Tracheostomy

---

We work closely with tracheostomy teams, patients and caregivers to tailor our products and services. Our close working relationship with key opinion leaders, continually enhances our knowledge and ability to improve patient experience.

### Infusion

---

We specialise in the support of patients receiving home infusion. While many patients, especially those receiving parenteral nutrition, may use our products long-term, we also help patients receive short-term care at home. Pain management, antibiotics and hydration can be delivered safely at home, and patients stay connected with their everyday lives.

## Our Hospital to Homecare PRODUCT SOLUTIONS

### CADD®-Solis VIP Pump

Therapy Areas: **Infusion, Oncology**

Our ambulatory infusion pump provides accurate and reliable medication delivery with a safe, simple and smart multi-therapy platform.

### acapella® choice device

Therapy Area: **Respiratory**

This hand-held device combines the benefits of both positive expiratory pressure (PEP) therapy and airway vibrations to help improve patients' quality of life.

### Cleo® 90 Infusion Set

Therapy Area: **Infusion**

A single-use disposable subcutaneous infusion set for use in a variety of infusion therapies, including insulin.

### Bivona® Customised Tracheostomy Tubes

Therapy Area: **Tracheostomy**

Our broad range of super-soft silicone tracheostomy tubes are designed to enhance patient comfort and safety for all patients.

### GRIPPER MICRO® Needle

Therapy Areas: **Oncology, Infusion**

With a low profile infusion site and foam padding, our portal access needle is ideal for small patients or for those requiring long-term or repeated infusions.

## *Our Team Approach*

# TRAINING, EDUCATION, PRODUCT SUPPORT AND TECHNICAL SERVICE

Smiths Medical emphasises a team approach which encompasses training, education, product support and technical service, designed to meet your on-going needs. Each region is supported by a Technical Services department which provides maintenance, repair and advice for all our pumps and equipment. Our account managers support clinicians by delivering tailored, hands-on training to hospital and homecare staff.

We are passionate about creating products that can strengthen the care you deliver. Not only can we help make treatments more comfortable and safe, a partnership with us means helping patients live their best lives.
