bringing technology to life

Hospital to Homecare Solutions

DESIGNED FOR A BETTER LIFE

**CADD®-Solis VIP Pump for Home
Total Parenteral Nutrition (TPN)**

The Way to Better STARTS WITH US

Matheus is a superhero. He was born with multiple health issues. Matheus is 6 years old, has lost his sight and needs support to eat and drink. He is now at home after a long 12 months in the hospital with the permanent support of infusion pumps for hydration and nutrition.

Recently Matheus had a breakthrough. He began to use the CADD® ambulatory infusion pump. Since he can carry his pump with him, he no longer needs to be confined during the day, allowing him to move and play where he would like. The CADD® pump takes care of Matheus's hydration, allowing him to focus on what matters most. Being a superhero. Because helping Matheus live his life at home is what matters most.

Patient and Provider

HOSPITAL TO HOMECARE SOLUTIONS

CADD®-Solis VIP Pump

The CADD®-Solis VIP pump provides accurate and reliable medication delivery with a safe, simple, and smart multi-therapy platform. The system is designed to promote patient care and safety for a variety of adult and pediatric patients and clinical care areas. Evaluated by LITRE Assessment of Ambulatory Pumps for Parenteral Nutrition 2016 in conjunction with Patients on Intravenous and Naso-gastric Nutrition Treatment (PINNT) Group, the CADD®-Solis VIP pump nutrition delivery can be individualised with taper up and down periods to fulfill the patient's specific needs, or can simply be programmed in continuous delivery.

At Smiths Medical, we are passionate about helping you deliver infusion therapy that allows your patients to go home earlier and stay home safely. We understand that quality homecare needs products that are reliable, accurate and easy to use. We are dedicated to partnering with you to help deliver care when and where it is needed.

We Partner With You To Help ...

ENHANCE PATIENT CARE

Five infusion delivery modes allow homecare to become a reality for oncology, nutrition, immunotherapy, hydration, pain management and more.

INCREASE EFFICIENCIES AND REDUCE COSTS

Easy to learn and simple to use, the CADD®-Solis VIP pump allows patients to receive treatment at home, improving patient throughput and freeing up hospital beds.

IMPROVE PATIENT EXPERIENCE AND ADHERENCE TO TREATMENT

The patient-friendly home screen shows progress of infusion, while pictorial troubleshooting screens guide patients without need for additional support.

PROTECT CAREGIVER AND PATIENT SAFETY

Homecare requires a system with safety built in. The CADD®-Solis VIP pump, with its protocol-based drug libraries, enables limits to be set for every type of infusion. Auditing for providers is enhanced with a system that captures the past 5,000 events for ease of reporting.

Our Infusion

THERAPY AREA – TOTAL PARENTERAL NUTRITION (TPN)

The CADD®-Solis VIP pump provides a full solution ...

Disposables

Our disposables for the TPN application have integrated a free-flow protection to help increase safety.

Accessories

Smiths Medical offers a wide variety of accessories from back packs and versatile power options to allow flexible use outside the home setting.

Parenteral Nutrition

Nutrition delivery can be individualised with taper up and down periods to fulfill the patient's specific needs.

Clinical Education and Support

Smiths Medical Clinical Services are committed to ensuring safety and best practice in the use of our products through clinical excellence, education and support. We promote and support clinical excellence by offering customers evidence-based programs and services designed to facilitate successful product application. Smith Medical has a team of clinical and educational professionals to support your training requirements.

Service and Repair

Service and repair options are available from fixed price repair to flexible service programmes.

Our Infusion

CARE AREAS

The CADD®-Solis VIP pump allows truly ambulatory infusion, helping to deliver care across the community ...

HOME

Small and lightweight to promote improved patient mobility and quality of life, the CADD®-Solis VIP pump is suitable for both paediatric and adult patients.

RESIDENTIAL AGED CARE

With a need to treat a broad range of conditions, our CADD®-Solis VIP pump supports safe delivery across a wide range of infusions in the aged care environment.

OUTPATIENT AND INFUSION CENTRES

Without the need to stand and monitor infusions, patient throughput is enhanced, delivering therapy as safely as you would on the ward.

MILITARY HOSPITALS

Protocols may be adapted to be specific for the patient, the facility or the medical personnel. Detailed reporting functions support audit and quality requirements to the highest standard.

CLINICIANS' OFFICE

Nutrition nurses and home nurses can easily set up and run infusions, meaning patients can be monitored during treatment without the time and expense involved in travelling to hospital.

Our Team Approach

TRAINING, EDUCATION, PRODUCT SUPPORT AND TECHNICAL SERVICE

Smiths Medical emphasises a team approach which encompasses training, education, product support, and technical service, designed to meet your on-going needs. Each region is supported by a Technical Services department which provides maintenance, repair and advice for all our CADD®-Solis VIP pumps and equipment.

Our account managers support clinicians by delivering tailored, hands-on training to homecare staff. We are passionate about creating products that can strengthen the care delivered. Not only can we help make treatments more comfortable and safe, a partnership with us means helping patients live their best lives.
