CADD[®] and Portex[®] Portfolio with the NRFit[™] Connector

Safer Connections from Pump to Patient

CADD® AND PORTEX® PORTFOLIO WITH THE NRFIT™ CONNECTOR

Aware

In 2014, the Joint Commission released Sentinel Event Alert 53: Managing Risk During Transition to ISO Tubing Connector Standards. The ISO 80369-6 neuraxial connector standard was published on March 2016. The goal is to reduce the incidence of medical device misconnections – and improve patient safety – by creating unique non-Luer connectors for neuraxial procedures. The neuraxial non-Luer connectors will be branded by all major manufacturers as NRFit™ connectors.

Prepare

Smiths Medical would like to help you to improve patient safety by switching to the NRFit™ neuraxial non-Luer connector. We'll help make the transition easier by providing support, guidance and product expertise.

Adopt

Before your facility adopts the new standard, it is important that all employees who will be involved become educated on the new 80369-6 standard for proper and safe use of non-Luer connectors. Share the information with your entire team, and be sure everyone understands the importance of this change for patient safety.

A FAMILIAR WAY TO CONNECT

The hubs and tapers of the NRFit™ connectors are smaller than those of standard Luer connectors, used commonly on many medical devices, but they operate much the same way. Like standard Luer connectors, NRFit™ connectors come together with a simple twist.

SAFETY FROM PUMP TO PATIENT

A COMPLETE NEURAXIAL SOLUTION THAT PROMOTES PATIENT SAFETY

The CADD® and Portex® Portfolio with the NRFit™ connector is an ISO 80369-6 compliant connection system intended to enhance patient safety through a reduction in the risk of misconnection, while minimizing any change to clinical technique.

Pinpoint stability

Connections in a snap

The feel of precision

Free-flow protection with a flip

Worry-less workflow

PORTEX® PORTFOLIO WITH THE NRFIT™ CONNECTOR

COMPLETE SOLUTIONS FOR CONTINUOUS EPIDURAL, SPINAL AND CSE INFUSION PROCEDURES

A TRUSTED BUSINESS PARTNER

Smiths Medical, the developer and manufacturer of the CADD® and Portex® products with the NRFit™ connector, is a leading supplier of specialty medical devices and equipment. The CADD® and Portex® brands of pain management and regional anaesthesia products are popular worldwide and have earned a reputation for quality, innovation and impeccable performance.
