Transport Ventilator

When the smallest lives are in your hands, you need equipment you can depend on like the babyPAC™ emergency and transport ventilator. The babyPAC™

ventilator's comprehensive range of features is designed specifically for the delicate neonate and infant lungs. The babyPAC™ ventilator is MRI compatible and

allows for precise oxygen concentrations. Accessories/disposables used with the babyPAC™ ventilator are also available from Smiths Medical.

## babypAC™ VENTILATOR

- Unique variable gas mixing system extends cylinder life and allows precise selection of oxygen concentration to meet patient needs.
- Calibrated inspiratory pressure control provides continuous adjustment of the end inspiratory pressure.
- Separate controls for inspiratory and expiratory provide careful management of inspiratory/expiratory time and pressure to suit patient breathing requirements.
- Four operating modes: CMV + PEEP; CMV + Active PEEP; IMV + CPAP; CPAP.
- Integrated pressure monitoring/alarm system uses visual and audible alarms to ensure patient safety.
- Adjustable pneumatic pressure relief with audible alarm provides a wide range of options to accommodate patient needs.
- Dual function PEEP/CPAP control allows continuous adjustment of pressure in the breathing circuit.
- MR compatibility allows flexible transport throughout the hospital.
- Low O<sub>2</sub> and air supply indicators change color as gas supplies deplete.
- Pneumatic operation eliminates the need for other power sources.
