GRIPPER PLUS® POWER P.A.C. Safety Huber Needles

Proven performance you expect,
now with power capabilities

GRIPPER PLUS® POWER P.A.C. needles provide the flexibility of use for any therapy need, including power injection of contrast media. GRIPPER PLUS® POWER P.A.C. needles allow for higher pressure and flow rates for power injections with PORT-A-CATH® POWER P.A.C. systems.

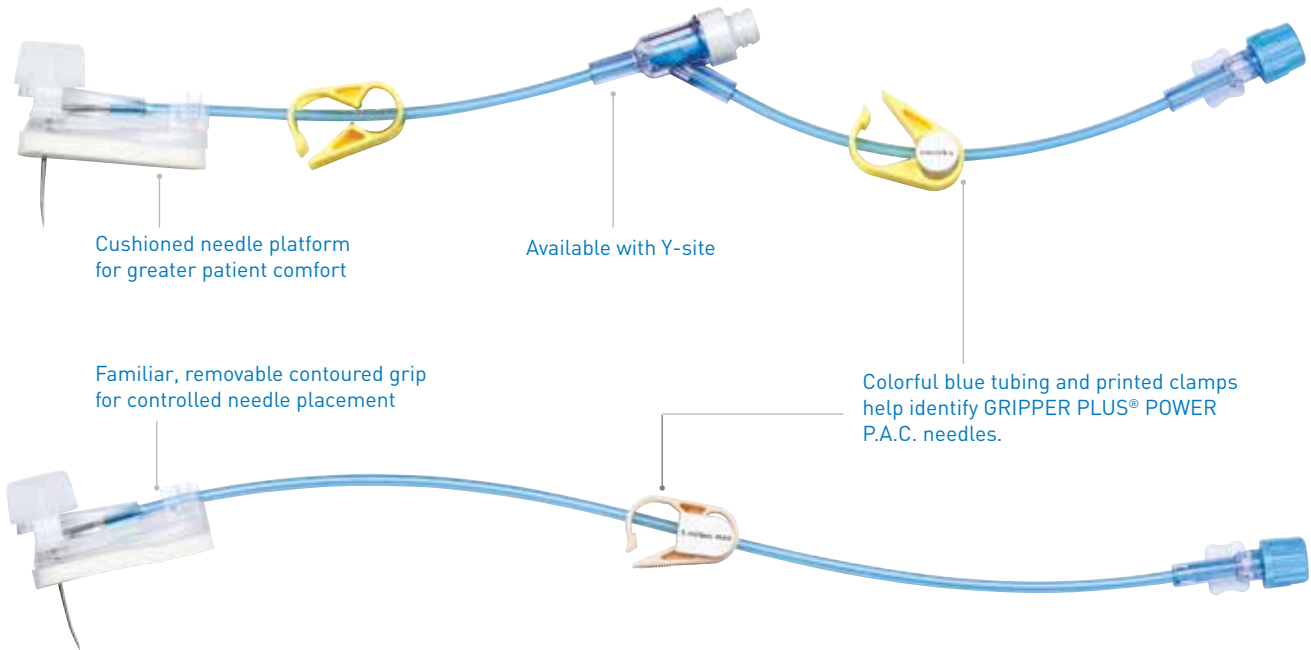

GRIPPER PLUS® POWER P.A.C. NEEDLES OFFER:

- Stable, cushioned platform
- Strong, latex-free plastic tubing
- Protected access site
- Needlestick protection
- Luer-lock connector
- 5 ml/sec flow rate

GRIPPER PLUS® POWER P.A.C. Safety Huber Needles

The GRIPPER PLUS® POWER P.A.C. needle's unique de-accessing method lifts the needle straight out with a single, smooth motion. The needle then "clicks" into a locked position, which protects you from needlesticks.

I.V. catheters may vary greatly with regard to materials, performance, and safety features. This guide is designed primarily for cross-referencing I.V. catheter gauges and lengths. Please contact your local Smiths Medical representative for assistance in cross-referencing to the I.V. catheter that best fits your clinical needs.
