Cleo® 90 Infusion Set

“All in One” Subcutaneous Infusion Set

Simply connect
“All in One” Subcutaneous Infusion Set

As easy as 1, 2, 3...
for simple, fast and secure insertion!

1 Twist cap to remove

2 Insert the cannula
Press device firmly until you hear a click, then maintain for 5 seconds

3 Connect the tubing set
Pull straight off

“All in One” Set
It’s unique patented housing includes both an introducer and a cannula. The pre-assembled Cleo® 90 Infusion Set makes insertions simple and fast.

Secure
The Cleo® 90 Infusion Set is a system which has its own needle protection device. After insertion of the cannula, the needle retracts automatically into its housing in order to reduce the risk of needle-stick incidents.

Flexible
The Flex Attach 360° site connection provides on-site rotation offering greater flexibility.
The advantages of Cleo® 90 Infusion Set are clear!

- **Enclosed needle safety**
  The enclosed needle retracts automatically into the housing after insertion, reducing the risk of accidental needlestick injuries.

- **Hidden insertion needle**
  The needle is protected during all the steps of the cannula placement.

- **“All in One” design**
  The patented housing contains both a cannula inserter and a needle retractor, providing you with maximum convenience and control.

- **Hypoallergenic dressing**
  The small, transparent adhesive dressing breathes yet keeps water out – and stays in place with less tape. Its patented release tab makes removal easy, too.

- **Variety of sizes**
  Available in needle lengths 6 and 9 mm.

- **360° Connection**
  Ability to rotate the connection of the tubing 360°, which offers you even more freedom and flexibility.

- **Standard luer lock connection**
Smiths Medical,

*a complete range of subcutaneous infusion sets
adapted to each one’s needs*
