LockIt Plus® Catheter Securement Device

Security that sticks
LOCKIT PLUS® CATHETER SECUREMENT DEVICE

SECURITY WITH A CLICK
The Lockit Plus® device securely sticks to the insertion site while minimizing catheter migration and kinking with an audible click:

- Transparent locking mechanism protects catheter patency and permits monitoring of the exit site
- Low profile for patient comfort
- Reversible lock secures the catheter in place and allows for clinical access when necessary
- Solid puncture site cover helps minimize kinking of the catheter exiting the body
- Large foam adhesive pad makes application easy and minimizes patient discomfort
- Peel-away liner over the adhesive backing enables easy and straightforward application
- Medical grade adhesive helps decrease skin irritation

"The Lockit Plus® fixation device appears to significantly reduce the risk of rare, but potentially life-threatening, intrathecal and intravascular migration."

Studies have shown, “Seventeen percent of catheters fail because they are prematurely dislodged…”

ASRA, 1999 Gaston Labat Lecture, Acute Pain: lessons learned from 25,000 patients, L. Brian Ready, MD, FRCPC.
